

Gregory J. Talotta

Software Engineer

Mr. Talotta joined Sonoma Technology in 2022. His work has included product development for Sonoma Technology's Insight® data management system, where he works to implement new features and suggest technical improvements to the system.

Mr. Talotta received his bachelor's degree in computer science from the University of Alaska Fairbanks in 2021. Before joining Sonoma

Technology, Mr. Talotta was a programmer for a permafrost research team under the University's Geophysical Institute. In that role, he primarily programmed a full stack data accessing tool for permafrost sensors located in the Arctic, and maintained multiple other websites and their hosting servers. He has experience in a variety of programming languages, including C, C++, C#, Java, JavaScript, TypeScript, Lua, Python, and MySQL.

Education

BS, Computer Science (Minor in Mathematics), University of Alaska Fairbanks
