

Eric J. Hoffer

Environmental Field Technician

Mr. Hoffer joined Sonoma Technology in April 2024. His work includes maintaining proper operation of state-of-the-science open-path instruments and point-monitoring stations at various refineries and community sites in southern California. His focus is on collecting high-quality air quality data to inform facility operators and members of the public about air quality conditions near these refineries and monitoring sites.

Prior to joining Sonoma Technology, Mr. Hoffer worked in the commercial swimming pool industry. He was primarily responsible for water quality management, equipment installation and repair, and training staff on best practices and standard operating procedures. His work focused on chlorine chemistry and automated chemical control systems.

Certifications
